We want your input!

Join us to help evaluate potential railroad crossing grade separation ideas throughout Palo Alto. Specific ideas related to separating the street from the railroad will be presented for Churchill Avenue, Charleston Road and Meadow Drive, and Palo Alto Avenue. There will also be further discussion of the Citywide tunnel and trench ideas.

Your feedback and ideas will be used to help identify the universe of grade separation ideas to be considered when shaping the citywide solution. Your opinion matters.

The community meeting will start with a presentation including specific engineering graphics, followed by a brief question and answer session. Participants will be asked to give input in small groups about the potential ideas presented.

Learn about this important effort and give us your feedback on existing conditions and issues, as well as your suggestions on the ideas that are presented.
