

Memorandum

From: Staff
To: Rail Expanded Community Advisory Panel (XCAP)
Date: April 15, 2020
Subject: Presentation by AECOM of Layout and Typical Sections for Churchill Partial Underpass

In January 2020 the City Council approved further study of two (2) new ideas for consideration as alternatives for grade separation. One of the new ideas is called the Churchill Partial Underpass and it is a proposed grade separation at Churchill Avenue. The other new idea is called the Meadow/Charleston Underpass and it is proposed at Meadow and Charleston.

Since the City Council decision in January, staff and the consultant team have been working diligently with the new idea proposer as well as the XCAP Technical Working Group to refine the new idea. The information attached to this memorandum includes the items listed in the list of attachments below to help illustrate the concept.

This information will be presented during the XCAP meeting. Staff and the consultants look forward to feedback from the XCAP.

Attachment:

Attachment A: Exhibits and Renderings for Churchill Partial Underpass which includes:

- Churchill Partial Underpass Exhibits (including typical sections)
- Before and After pictures of Alma looking north and south
- Various renderings of the Churchill Partial Underpass
